

Spliss - your virtual whiteboard

Turn your large touchscreen into a virtual whiteboard or flipchart - including all the wall space you need to arrange your notes. Spliss provides all the features you expect for an unprecedented user experience:

- draw with your finger or any stylus using different colors and styles. The line width automatically follows your pointers size.
- Make annotations on top of any application and capture screenshots.
- Arrange all notes and loaded images on the virtual table or wall. Zoom in and out and move around everything with multitouch gestures.
- Spread your notes directly by email or store them on disc.

Details:

- Requires special touch hardware
- Works on WindowsXP and Vista
- Currently supports JPEG images and Quicktime h.264 videos
- Features include:
 - Annotations/Screenshots
 - Free drawing and erasing
 - Import of images and playback of video
 - Storage and emailing of images and drawings
 - Table mode to rotate the whole application
